Power Automate

Lab Prerequisites

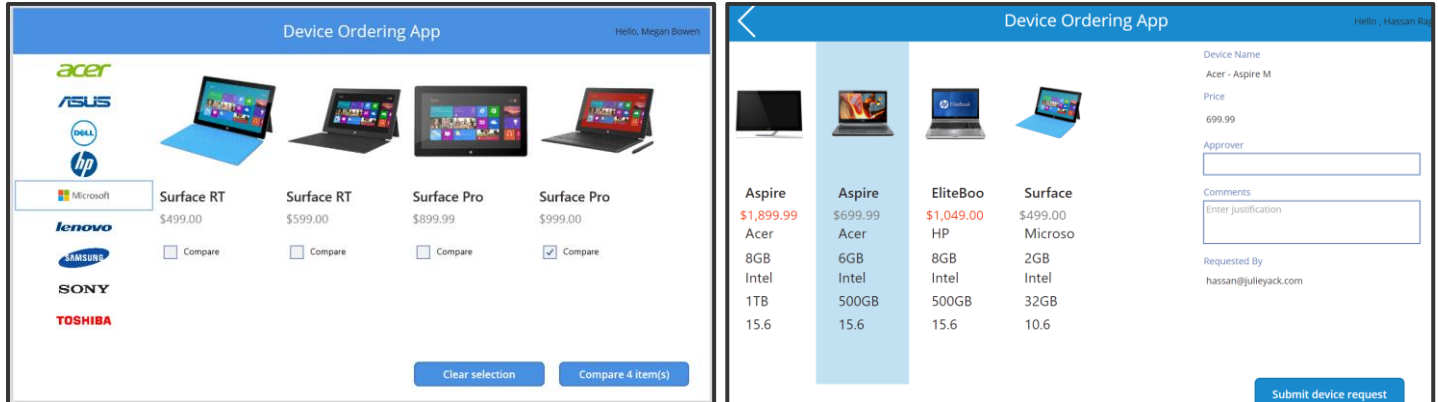

This is the fourth lab in a five-part series covering Power Apps, Microsoft Dataverse, and Power Automate. The assumption is that you have successfully completed the first three modules, or at least the initial part of setting up an environment as described in the overview – **“00-AppInADay Lab Overview.pdf”**.

If you have not completed the previous modules, you can use the partially completed version of the lab package in the “\Completed\Module3” folder. Follow the instructions in the document “Importing Module 3 Completed” before proceeding with this module, which will provision the app and the Microsoft Dataverse Table into your environment.

Integrating a Power Apps App with Power Automate

In this lab, you will create a flow that uses the Modern Approvals service to automate the approval workflow – it will send an email to the selected approver and take an action based on their response.

You should already have an app with these two screens:

Exercise 1: Create Approval Request Flow

The flow will trigger when a new item is added to the **Device Order** Table in the Microsoft Dataverse.

- It will use the Approvals Service to send an approval request.
- The approver will receive an email with options to Approve or Rejects and add comments.
- Once the approver responds, the record in the Device Order table will be updated with the appropriate approval status and comments.
- An email will be sent to the requester informing them whether the device was approved or rejected.

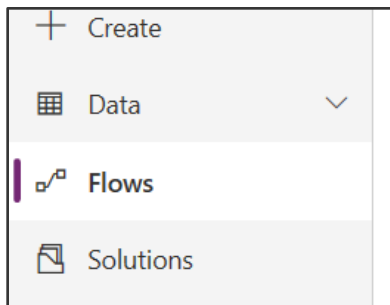

There are two ways to create a flow – from blank or from a template. In this lab, we will create the approval flow starting with a blank flow.

Task 1: Login on Power Apps website and create a flow

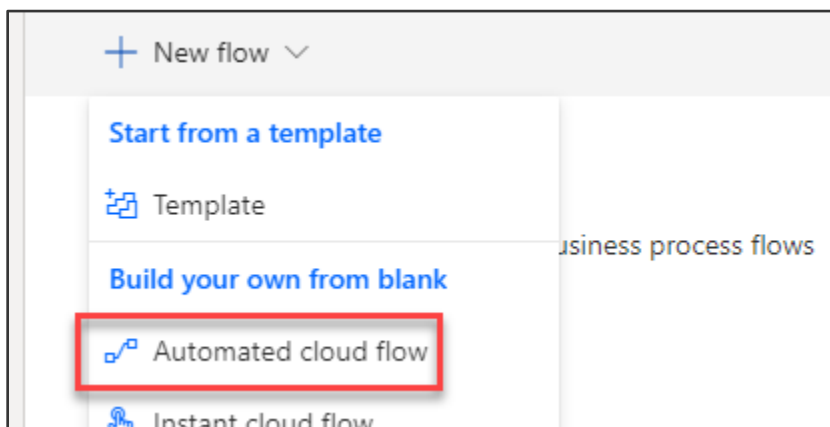

1. Navigate to [Make Power Apps](#) and make sure you are in the correct environment.

2. Select **Flows**.

3. Click **New** and select **Automated – cloud flow**.

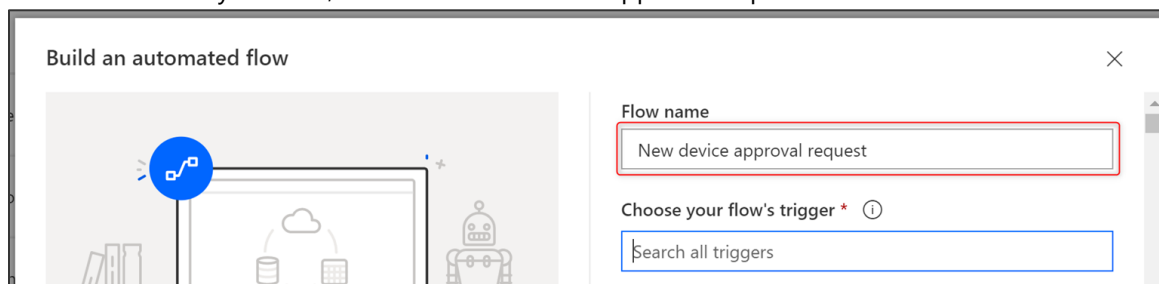

Task 2: Configure the trigger

The first thing you will need to configure is the trigger, i.e. when should this flow run. A flow can be triggered:

- manually from a Power Apps app,
- manually from a flow button,
- on a fixed schedule, or
- when an event occurs, such as a new item being added to a table, a new email arriving in a user's inbox, a new tweet being posted that meets certain conditions, etc.

In this scenario, we will configure the flow to trigger when a **new item is added** to the **Device Order Table** table in the **Microsoft Dataverse**

1. **Enter a name** for your flow, such as – “New device approval request”

2. In the **Choose your flow's trigger** box, search for when a row is added and select **When a row is added modified, or deleted**.

Flow name

New device approval request

Choose your flow's trigger * ⓘ

[Skip](#) [Create](#) [Cancel](#)

3. Click **Create**
4. Select **Create** for Change type
5. Click the **Table Name** drop-down and select **Device Orders**. You can type "device orders" to search for it.
6. Click the **Scope** drop-down and select **Organization**. Scope allows you to limit when your flow will run, for example you could choose User and it would only run for orders you create. In this case you are choosing organization because you want this flow to run for records created by anyone in your entire organization.

When a row is added, modified or deleted ...

* Change type ▼

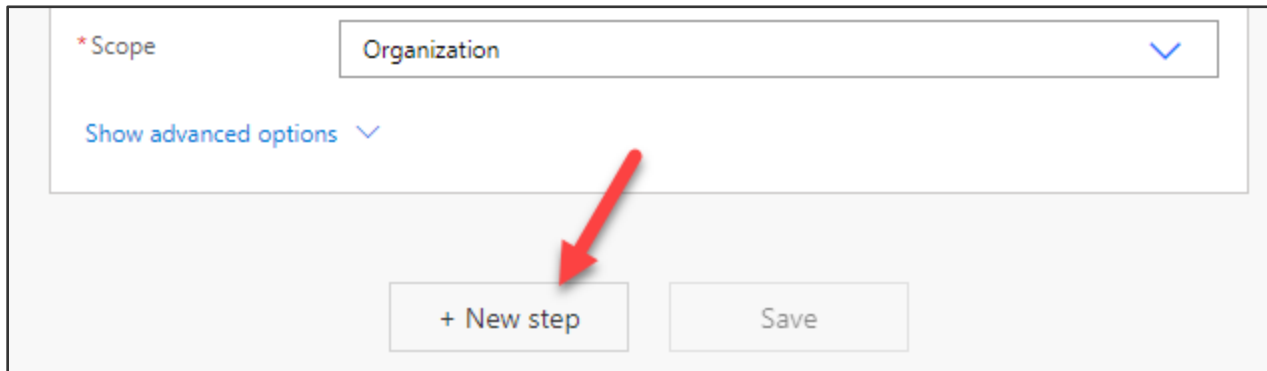

* Table name ▼

* Scope ▼

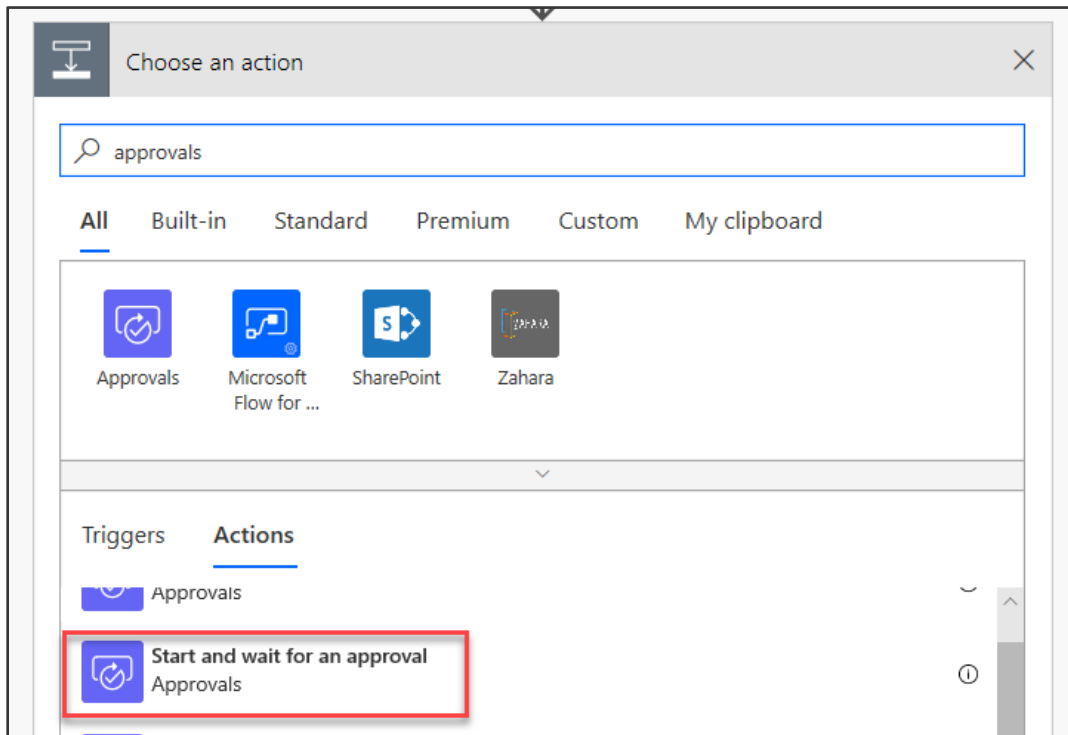

[Show advanced options](#) ▼

Task 3: Add action to send an approval request

1. Click **+ New step**.

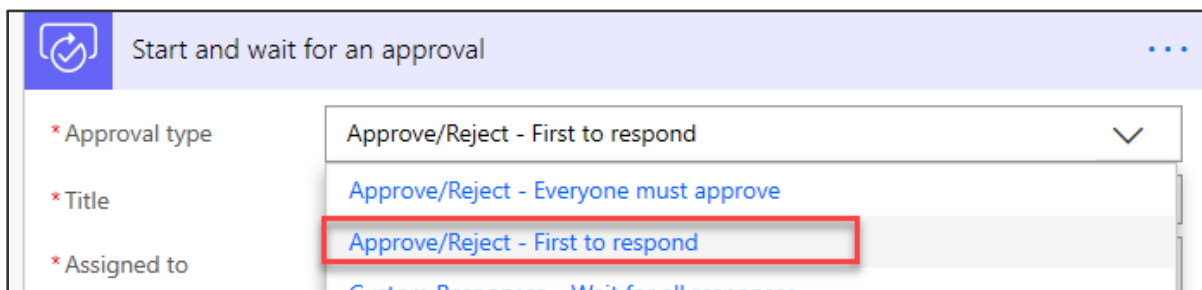

2. Search for **Approvals** and select **Start and wait for an approval**.

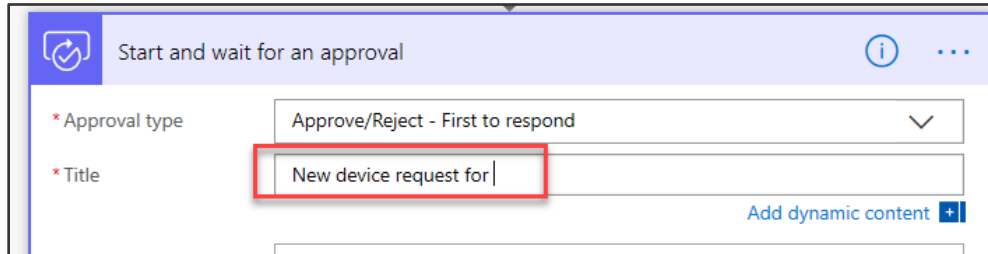

This will use the modern approval service. For more information see the blog post at [Flow Modern Approvals](#).

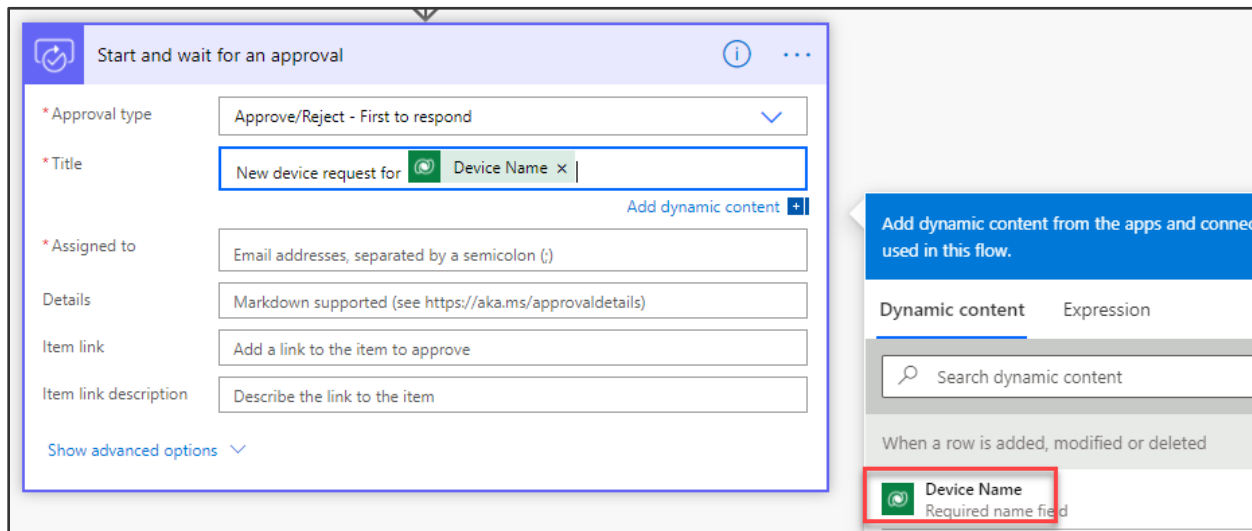

3. In the **Approval type** dropdown select **Approve/Reject - First to Respond**.

- For the Title, we will add some text and one variable. This variable will contain the Device Name of the device order request. Enter **New device request for** in the **Title** text box.

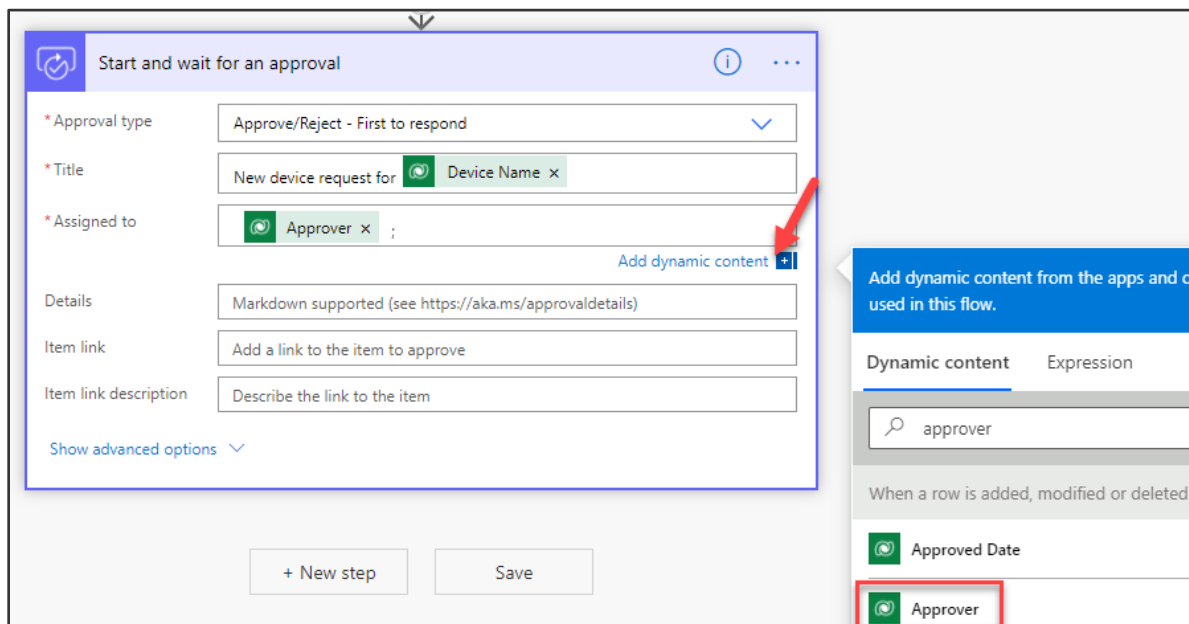

- Select **Device Name** for the **Dynamic content**.

Note: if the Dynamic content box is not visible, click the Add dynamic content button - 

- Select the **Assigned to** field, select click **Approver**. Click on the **Add dynamic content** button to show/hide the dynamic content pane.

You might get a warning message about this field being optional. Ignore it and ignore similar warnings in future.

Note: Recall from the earlier lab that this will be the approver's email address.

7. Click **Show Advanced Options**.

14. Hit Enter, type **Comments:** and select **Comments**.

The screenshot shows the configuration for the 'When a row is added, modified or deleted' connector. The 'Details' section is highlighted with a blue box, showing the following fields:

- A new device has been requested
- Device Name x
- Price x
- Department Contribution: \$
- Department C... x
- Comments: Comments x

The 'Dynamic content' pane on the right shows the 'Comments' connector selected, with the text 'Add dynamic content from the apps and connectors used in this flow.' and 'When a row is added, modified or deleted'.

15. Your **Flow** will now look like the image below.

The screenshot shows the completed flow. The first step is 'When a row is added, modified or deleted' with the following configuration:

- * Change type: Create
- * Table name: Device Orders
- * Scope: Organization

The second step is 'Start and wait for an approval' with the following configuration:

- * Approval type: Approve/Reject - First to respond
- * Title: New device request for Device Name x
- * Assigned to: Approver x
- * Details: A new device has been requested, Device Name x, Price x, Department Contribution: \$, Department C... x, Comments: Comments x
- * Item link: Add a link to the item to approve
- * Item link description: Describe the link to the item
- * Requestor: Requested By x
- * Enable notifications: Yes
- * Enable reassignment: Yes

16. **Save** your flow

Note: When creating your own approval flows, you may additionally include a clickable link that will be displayed in the approval email. In this scenario, for example, you could include a link to view device details in an online catalogue. You would include the **Item link** and **Item link description**.

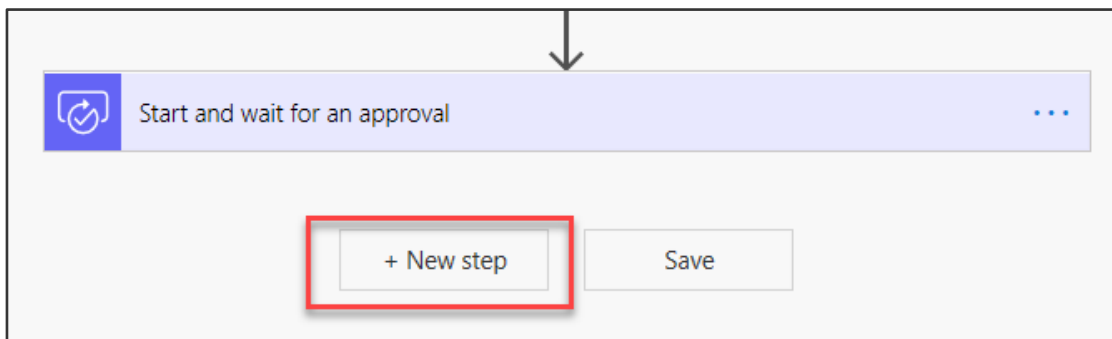

Note: You could also set the **Item link** to deep link into a Power Apps app to view more details about the request. In this scenario, you might pass an OrderID or a DeviceID as a URL parameter. Power Apps accepts URL parameters, see [Flow URL Parameters](#) for more details.

Exercise 2: Conditional Logic

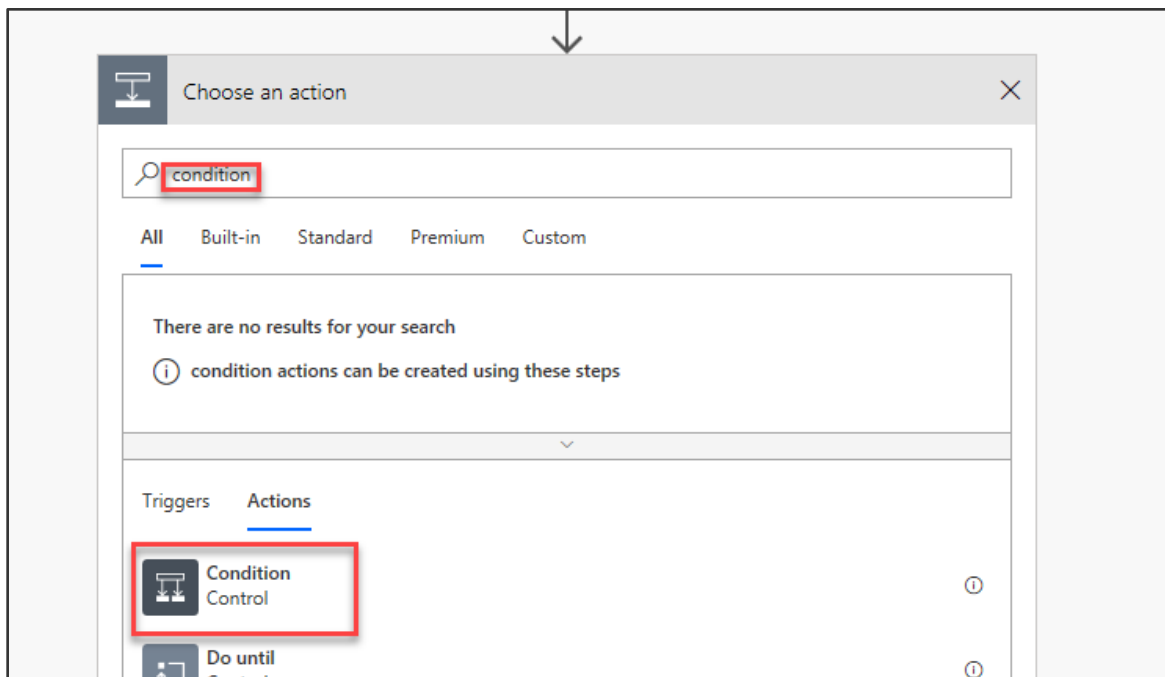

In flow, you can add conditions to take different actions depending on a certain result, in this case, whether the request was approved or rejected.

Task 1: Add conditional logic to flow

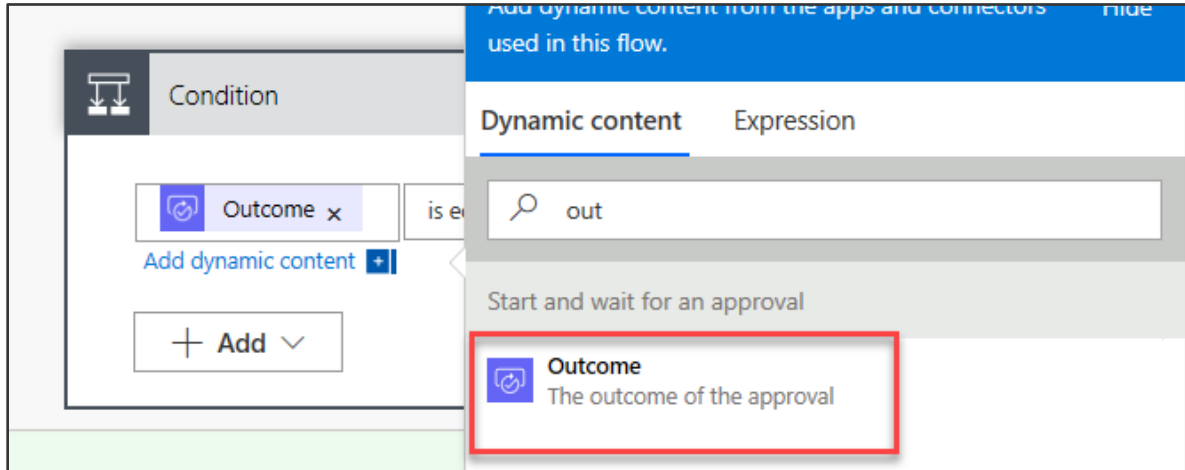

1. Click **+ New step**.

2. Search for **Condition** and select it.

- Click in the left edit box that says, "Choose a value" and select **Outcome** from the dynamic content pane. You may need to press the "+" icon below the edit box to hide the dynamic content pane.

- Select **is equal to** for condition and type **Approve** for **Value**.

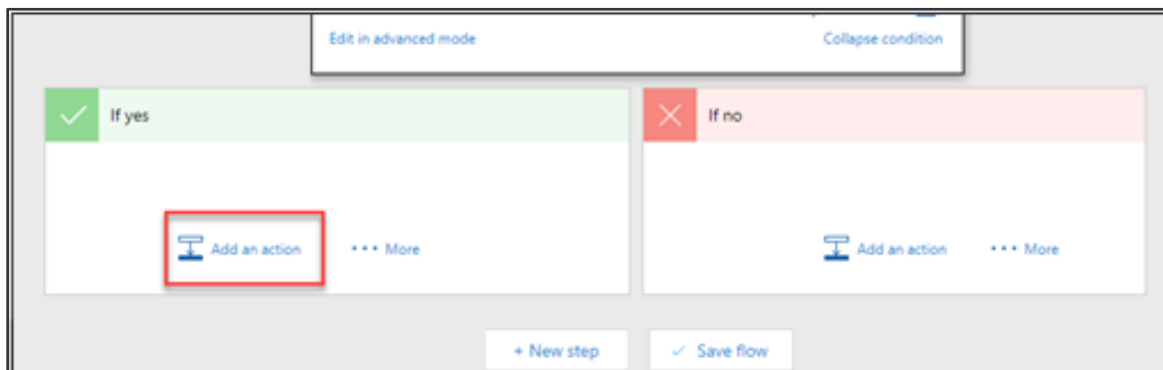

Task 2: Add conditional logic to flow

We will now configure what actions to perform if the response is approved or not – YES branch vs. NO branch.

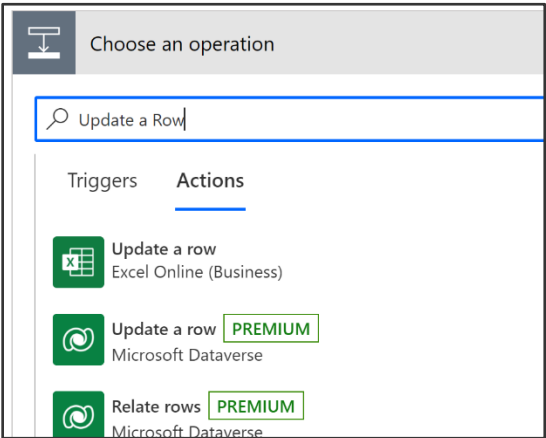

We will add two actions:

- Update the record in the Device Order table
- Send an email to the employee who requested the device

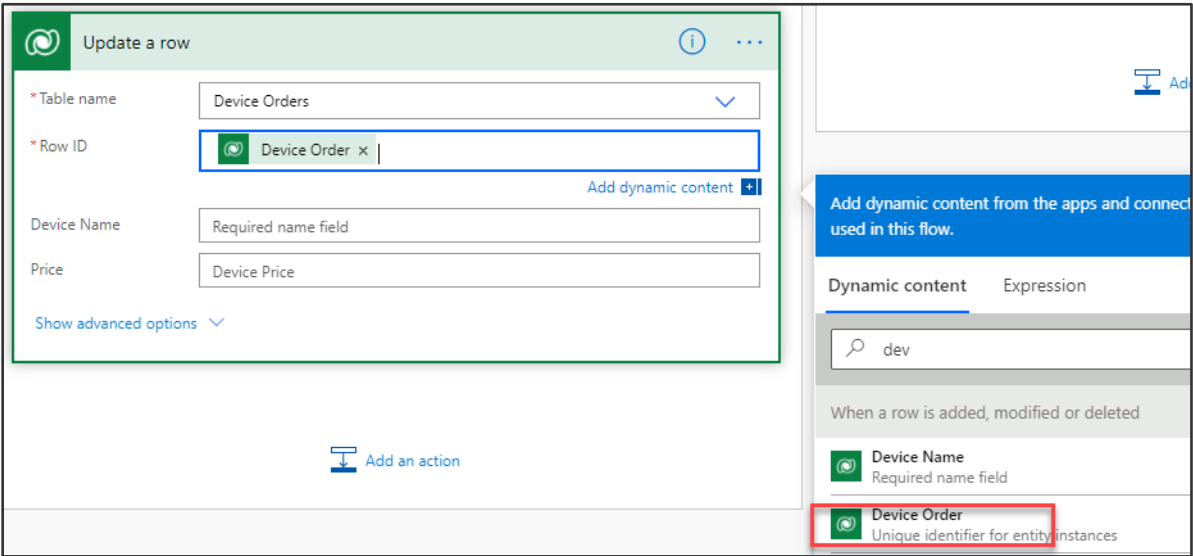

- In the left **If yes** box, click **Add an action**

2. Search for **Update a Row** and select **Update a Row Microsoft Dataverse**

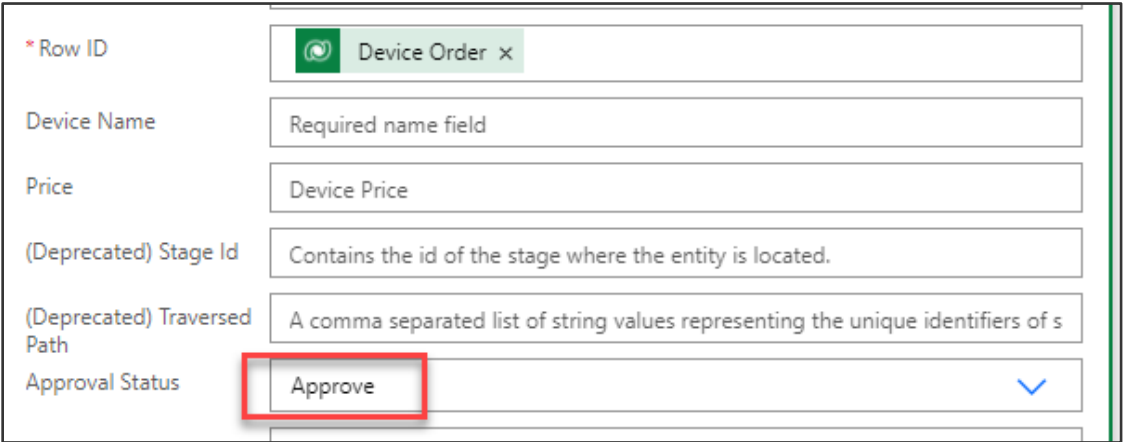

3. Select **Device Orders** for **Table Name**.
4. Click on the **Row ID** and select Device Order from the Dynamic content pane.

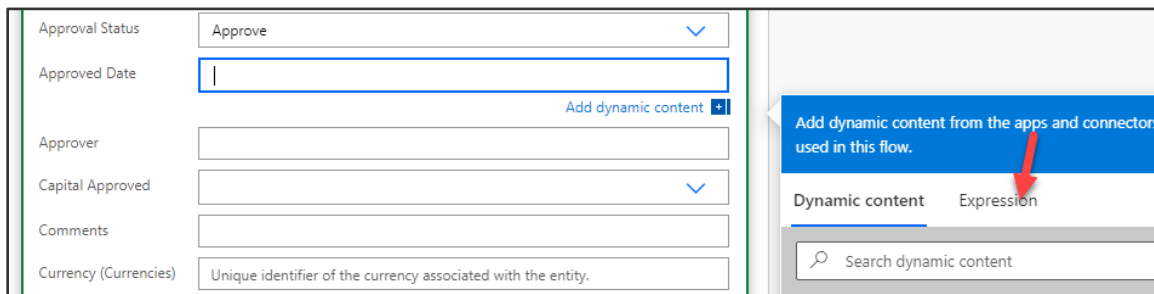

This is the unique lookup ID for the record (or row) that was created.

5. Click **Show advanced options**.
6. Select **Approve** from the **Approval Status** drop-down.

7. Select the **Approved Date** field and select the **Expression** tab.

The screenshot shows a form with fields: Approval Status (dropdown), Approved Date (text input), Approver (text input), Capital Approved (dropdown), Comments (text input), and Currency (Currencies) (text input). The 'Approved Date' field is selected. To the right, the 'Dynamic content' pane is open, showing the 'Expression' tab. A red arrow points to the 'Expression' tab. The pane also shows a search bar and a list of dynamic content items.

8. Type **utcNow()** and click **OK**.

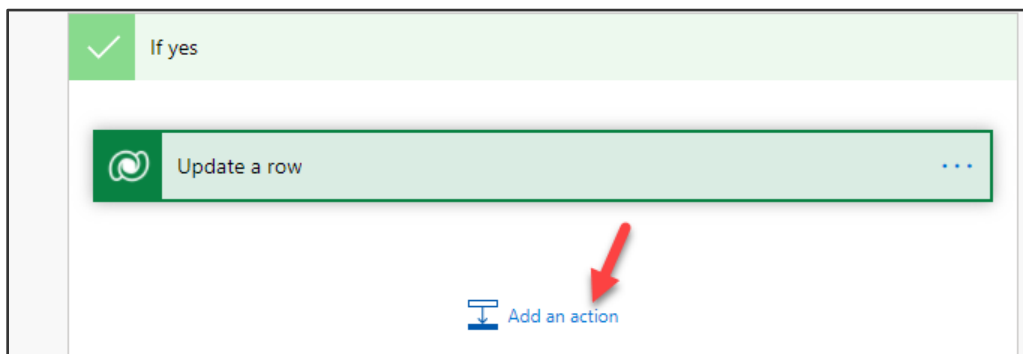

The screenshot shows the same form as before. The 'Approved Date' field now contains the text 'utcNow()'. A red box highlights the field. To the right, the 'Dynamic content' pane is open, showing the 'Expression' tab. A red arrow points to the 'OK' button. The pane also shows a search bar and a list of dynamic content items.

9. In the Comments column, we want to preserve the earlier comments. To do so, select the **Comments** column and select **Comments** from the Dynamic content pane.
10. Save the flow.

Task 3: Add another action

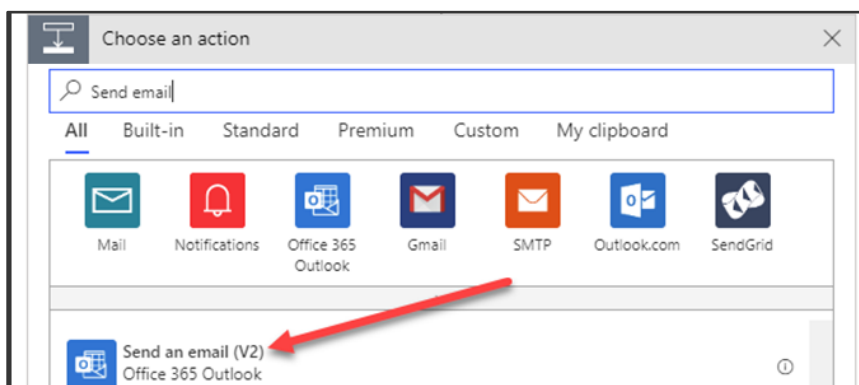

You will now add the send email action to the If Yes branch.

1. From within the yes branch, Click **Add an Action**.

The screenshot shows a flow with a green 'If yes' branch. Inside the branch, there is an 'Update a row' action. Below the 'Update a row' action, there is a blue button labeled 'Add an action' with a red arrow pointing to it.

2. Search for **send email** and select **Send an email (V2) – Office 365 Outlook**.

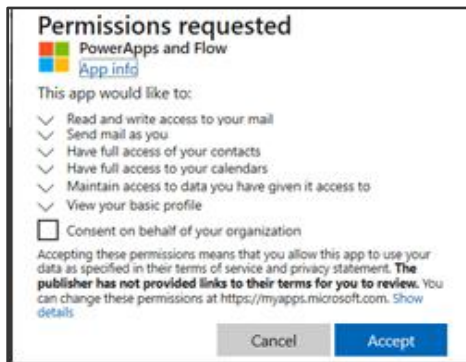

The screenshot shows the 'Choose an action' dialog box. The search bar contains the text 'Send email'. Below the search bar, there are tabs: All, Built-in, Standard, Premium, Custom, and My clipboard. The 'All' tab is selected. Below the tabs, there is a list of actions: Mail, Notifications, Office 365 Outlook, Gmail, SMTP, Outlook.com, and SendGrid. A red arrow points to the 'Send an email (V2) Office 365 Outlook' action.

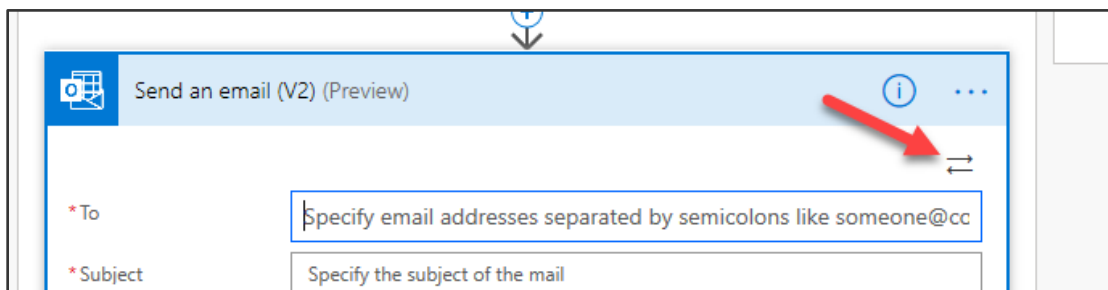

3. Click **Sign in**.

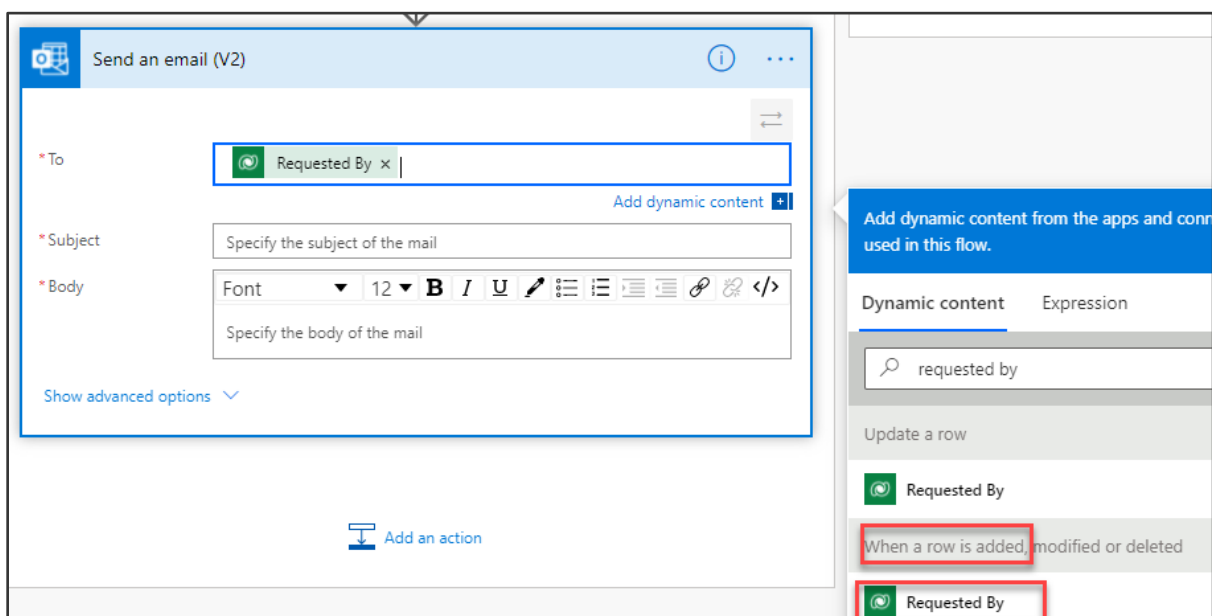

4. Click **Accept**.

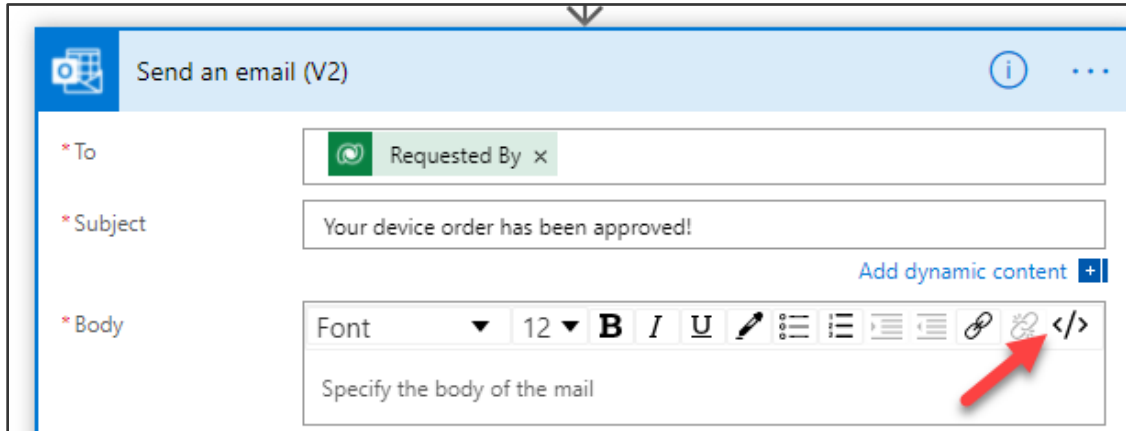

5. Click on the **To** field and click **Switch to Advanced Mode**.

6. Select **Requested By** for **To**. Select from under the **When a record is added** action.

7. Type **Your device order has been approved!** for **Subject**.
8. Click on the **Code View** button.

Send an email (V2)

* To: Requested By x

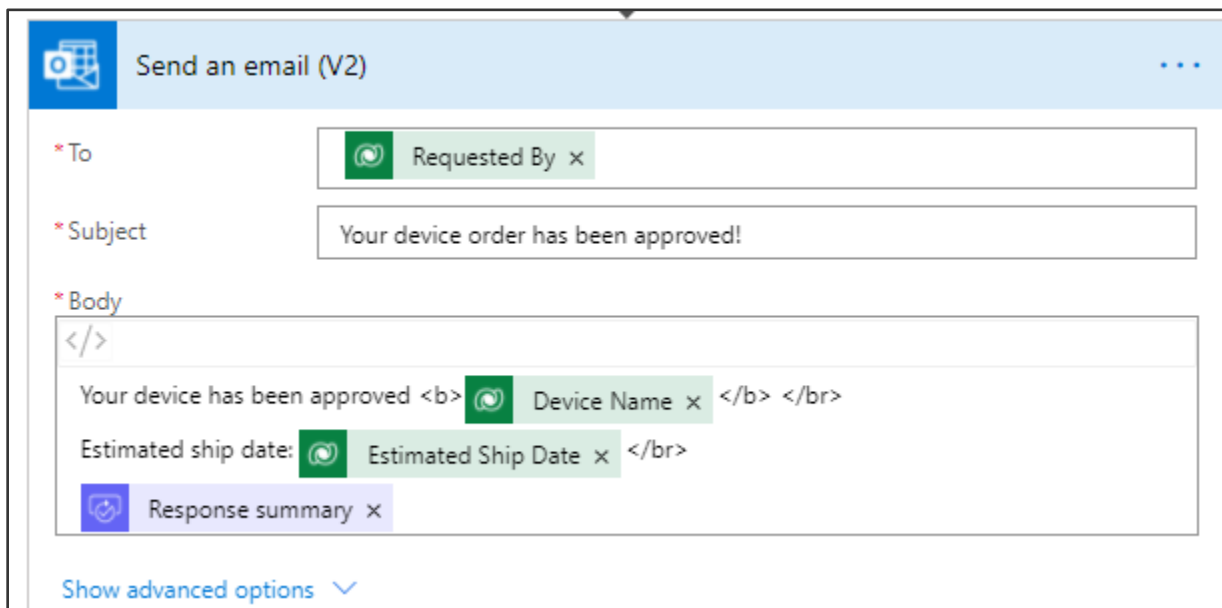

* Subject: Your device order has been approved!

* Body: Font 12 B I U [Rich Text Editor Icons] [Code View Icon]

Specify the body of the mail

9. Set the **Body** value as shown below:

Select **Device Name** and **Estimated Ship Date** from the **When a record is added** action.

Send an email (V2)

* To: Requested By x

* Subject: Your device order has been approved!

* Body: </> Your device has been approved [Device Name] </br> Estimated ship date: [Estimated Ship Date] </br> Response summary x

Show advanced options v

Note: If you do not have an Office 365 mailbox setup, you can use one of the other connectors to send the email, such as Outlook.com, Gmail or SendGrid.

10. Click **Save**.

Exercise 3: Test the cloud flow

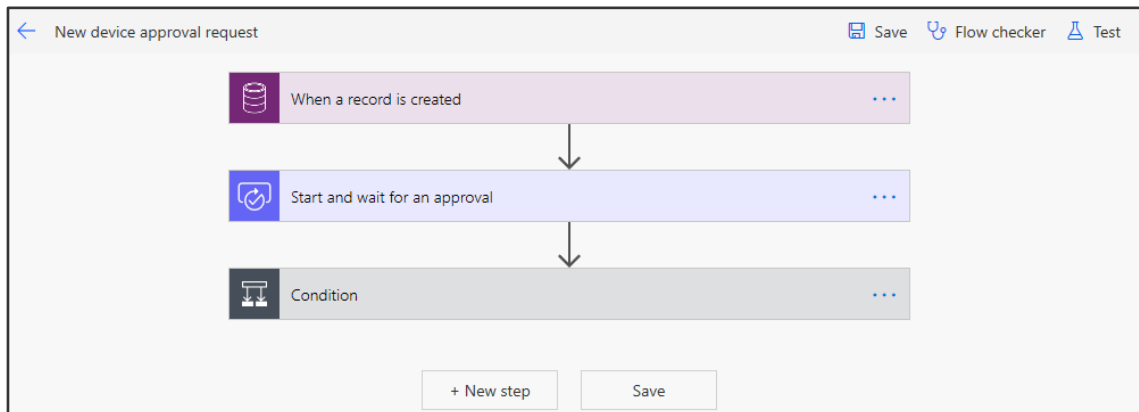

To test the flow, you will:

- Run the Device Ordering app and submit an approval request
- Verify the request was sent to the approver
- Approve the request
- Verify that the Microsoft Dataverse record was updated, and an email was sent back to the requestor

Task 1: Test the cloud flow

Note: When a new device record is added to the Device Order Table in Microsoft Dataverse, it may take up to ten minutes for the flow to trigger. To ensure the flow runs immediately, select the **Test** option in the top right and select the **“Manually”** option. Then go ahead and submit a device request. The flow should run immediately.

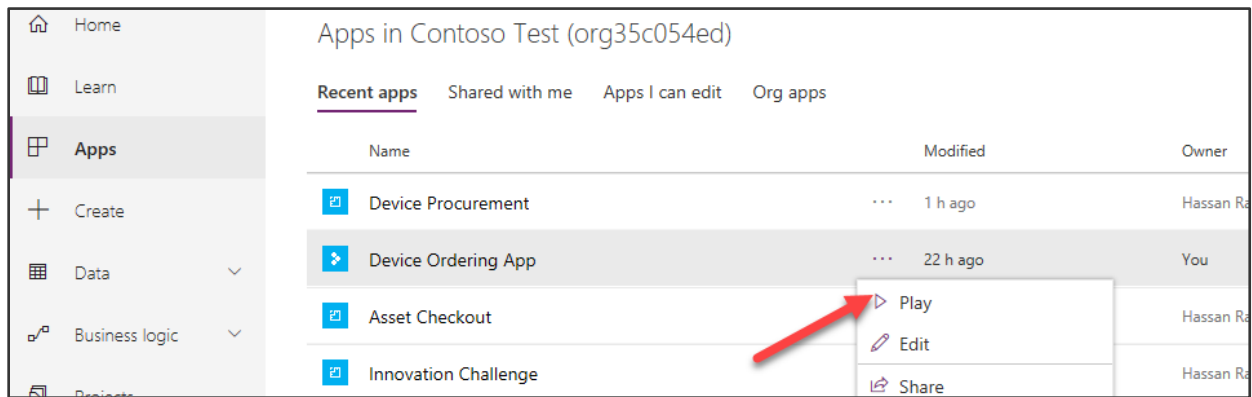

Note: You may see a warning in the Flow checker that the Power Automate Approvals has not been installed for your environment. Run the flow to initiate provisioning the Power Automate Approvals.

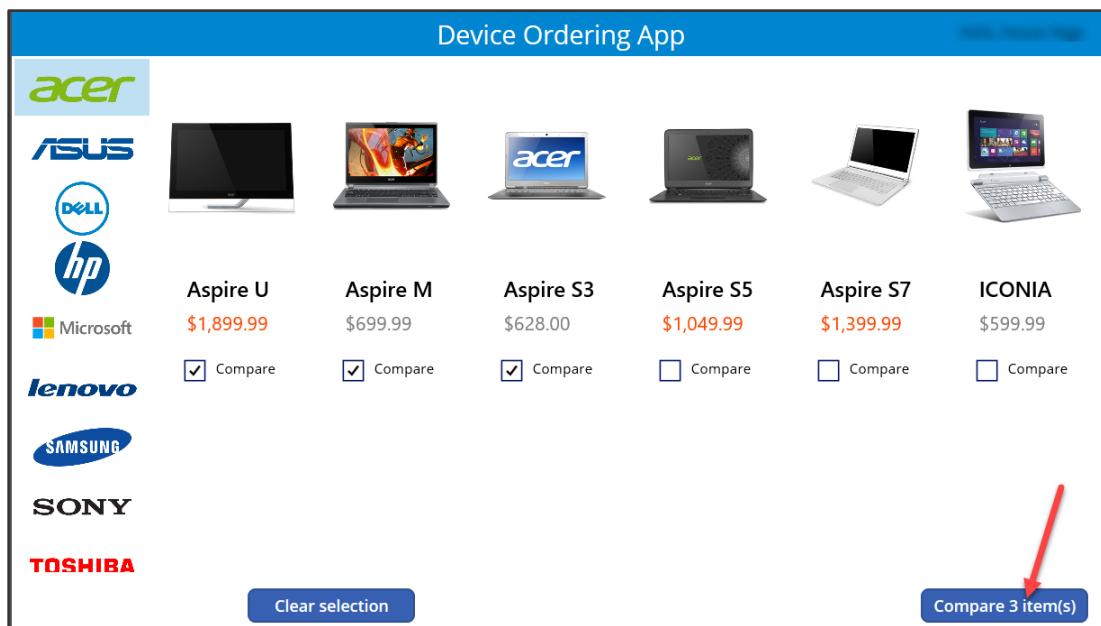

1. Select **Manually** and click **Save & Test**.

The "Test Flow" dialog box is shown. It has a close button (X) in the top right corner. There are two radio button options: "Manually" (selected) and "Automatically". Below "Manually" is the text "Perform the starting action to trigger it." At the bottom, there are two buttons: "Save & Test" and "Cancel".

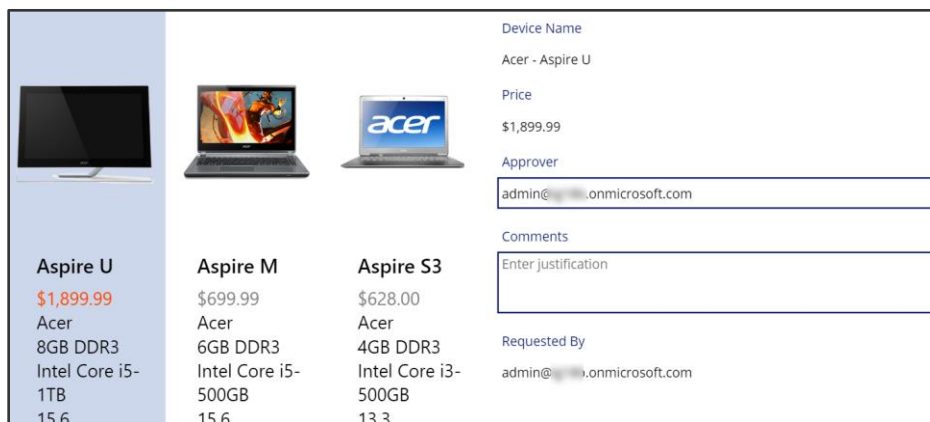

2. To submit a device request, go to [Make Power Apps](#)
3. Select **Apps** and start the **Device Ordering App**.

4. Select a few devices and click Compare.

5. Select one of the devices, provide email for Approver.

6. Provide a comment and click Submit device request.

			<p>Device Name Acer - Aspire U</p> <p>Price \$1,899.99</p> <p>Approver admin@...onmicrosoft.com</p> <p>Comments I need this device for super work.</p> <p>Requested By admin@...onmicrosoft.com</p> <p>Submit device request</p>
<p>Aspire U</p> <p>\$1,899.99</p> <p>Acer</p> <p>8GB DDR3</p> <p>Intel Core i5-1TB</p> <p>15.6</p>	<p>Aspire M</p> <p>\$699.99</p> <p>Acer</p> <p>6GB DDR3</p> <p>Intel Core i5-500GB</p> <p>15.6</p>	<p>Aspire S3</p> <p>\$628.00</p> <p>Acer</p> <p>4GB DDR3</p> <p>Intel Core i3-500GB</p> <p>13.3</p>	

7. Click **OK**.
8. The flow will run and send email to the manager email you provided. The request for approval email will look like the image below; it will include **Device information**, **Price**, **Department Contribution (the calculated field)**, and the **Requester Comment**.

REMINDER: If the flow does not run immediately, please wait, it may take up to ten minutes for the flow to be triggered. To ensure the flow runs immediately, see note above - select the **Test** option in the top right and select the "I'll perform the trigger action" option. Then go ahead and submit a device request. The flow should run immediately. The email, however, may take a few minutes to appear regardless of when the flow starts.

- Save** the flow.

Task 2: Test the updated Flow

- Click **Test** in the top right of the flow editor and start the Flow.
- Run the Device Ordering app -> Select a device and submit an approval request.
- You should receive an email with options to Approve or Reject the request. Select **Reject** this time and enter some comments, such as "Not eligible for new device." Click Submit.

Date Created: Wednesday, June 5, 2019 6:06 PM GMT

Details: A new device has been requested
Acer - Aspire US\$1899.99
Department Contribution \$190
Comments: I need this device for super work.

Approve v Reject ^

Not eligible for new device.

Submit

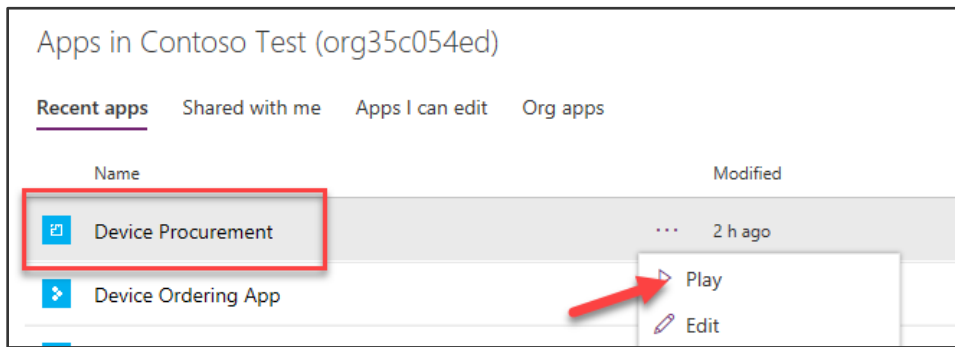

- Confirm that the requestor receives an email informing them that their device approval request was rejected.

This message was sent with low importance.

Sorry your request for Acer - Aspire U was NOT APPROVED.

Approver: 18, admin@ onmicrosoft.com Response: Reject Request Date: Wednesday, June 5, 2019 6:06:34 PM Response Date: Wednesday, June 5, 2019 6:08:16 PM

5. Navigate to [Make Power Apps](#) select **Apps** and start the **Device Procurement** application.

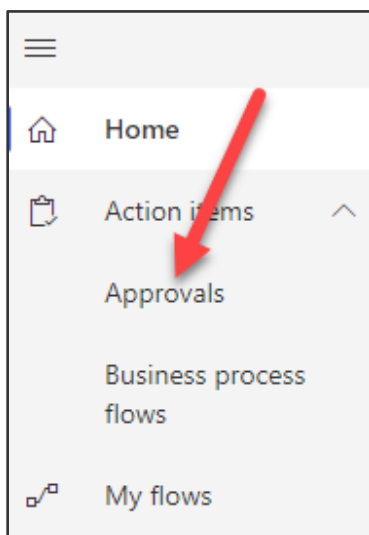

6. Device Orders will now have the Approval Status.

Active Device Orders

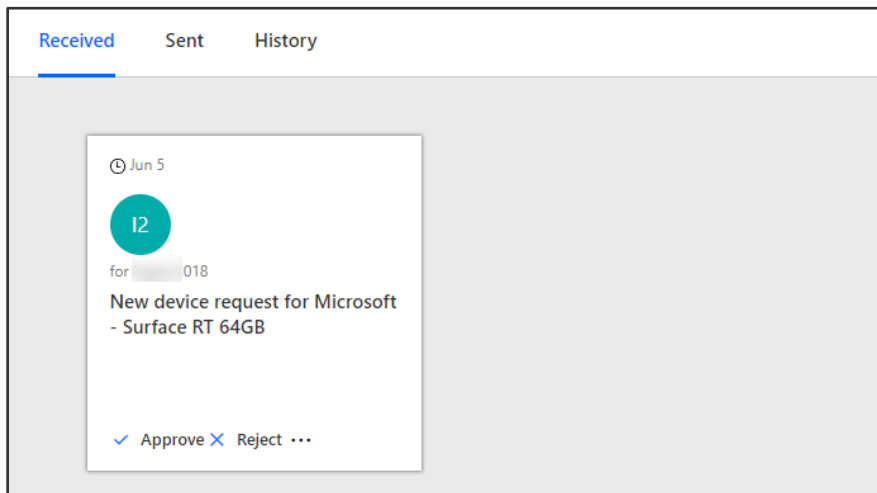

Device Name	Created On	Approval Status
Acer - Aspire U	10/26/2018 11:34 AM	Approve
Acer - Aspire U	10/25/2018 3:11 PM	---
Asus - K55VD	10/25/2018 3:13 PM	---
Dell - Inspiron 17	10/26/2018 12:02 PM	Reject

Task 3: Visit the approval center

1. Use the Device Ordering app to **submit a few more approval requests**.
2. Navigate to [Power Automate](#) and make sure you are in the correct environment. Login with your lab credentials if prompted.
3. Expand **Action items** and select **Approvals**.

4. Notice that all pending approval requests are visible.

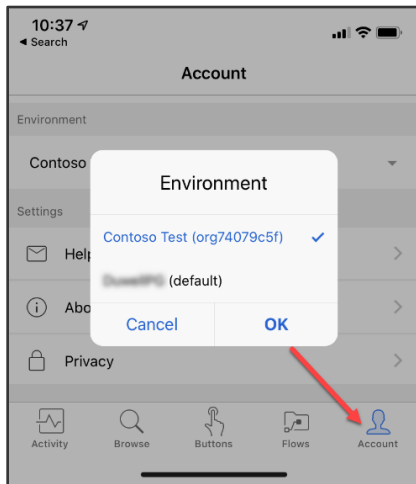

5. Go ahead and approve or reject a request from this screen. The details are displayed in the right pane where you can **enter comments** and **Confirm**.

A screenshot of the 'Respond: Approve' dialog box. The title bar says 'Respond: Approve' with a close button. The dialog is divided into two main sections: 'Overview' and 'Details'. The 'Overview' section contains the following information: 'Approval: New device request for Acer - Aspire U', 'Requester: MOD Administrator' (with a blue circle icon containing 'MA'), and 'Received: Nov 27, 03:00 PM (43 sec ago)'. The 'Details' section contains: 'A new device has been requested', 'Acer - Aspire U, \$1899.99', 'Department Contribution \$190', and 'Comments'. Below the 'Details' section, there is a dropdown menu currently set to 'Approve'. Underneath the dropdown is a text input field with the placeholder 'Add a comment (optional)' and the text 'Nice device' entered. At the bottom of the dialog, there are two buttons: 'Confirm' (in blue) and 'Cancel' (in grey).

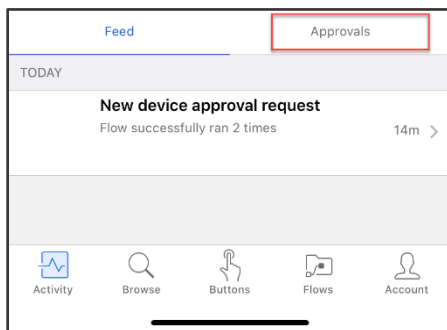

6. The request will no longer be visible as it has been processed.

Note: All approval requests sent to the current logged on user will be visible in the Approvals Center. This includes approvals sent from any app or flow.

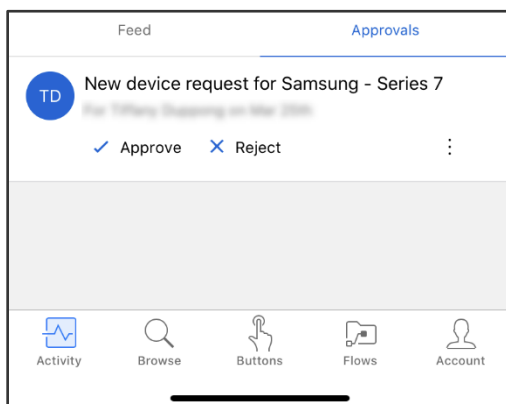

7. You can also use the Approvals Center to view all requests that you have sent and are **Awaiting response** from the approver. Select the **Sent requests** tab at the top to view all requests that you have sent.
8. Open the **Power Automate mobile app** on your mobile device.
9. Login and switch to the environment where the flow is deployed.

10. Select **Approvals** in the top right and view all pending approvals.

11. You can quickly approve or reject these pending requests from this screen.

12. If you have push notifications turned on and are signed into the flow mobile app – when you receive a new Approval request it will trigger a push notification on your phone. You can give this a shot.

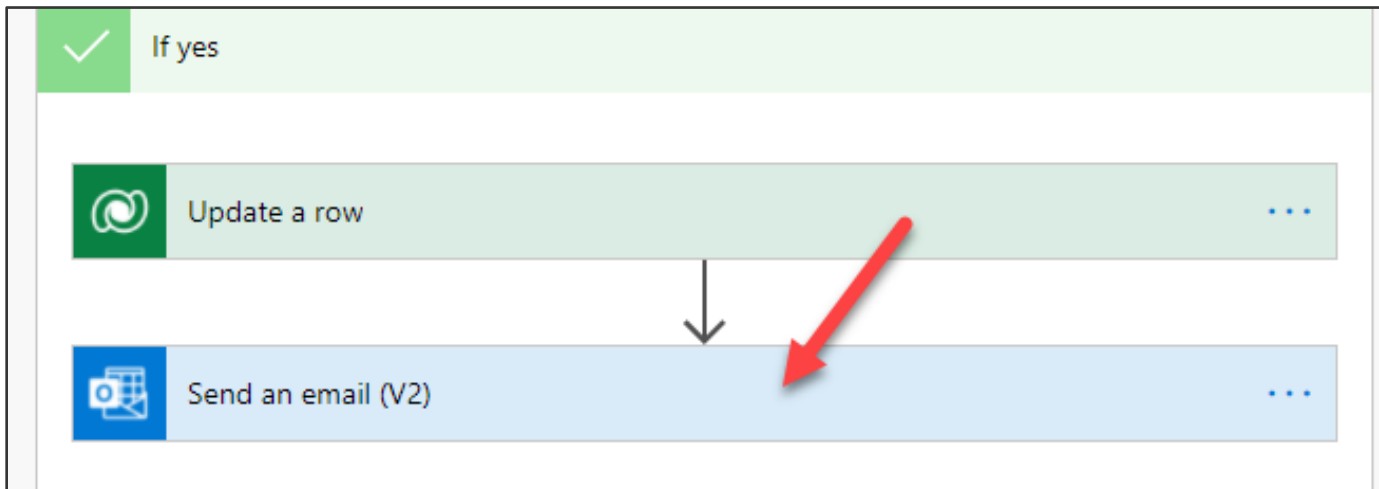

Congratulations! You have successfully completed this lab. You have created your Power Apps app and flow and connected them to a Microsoft Dataverse Table. Now you are ready to build your own apps and workflows.

Exercise 4: (Optional) Add a Teams Notification

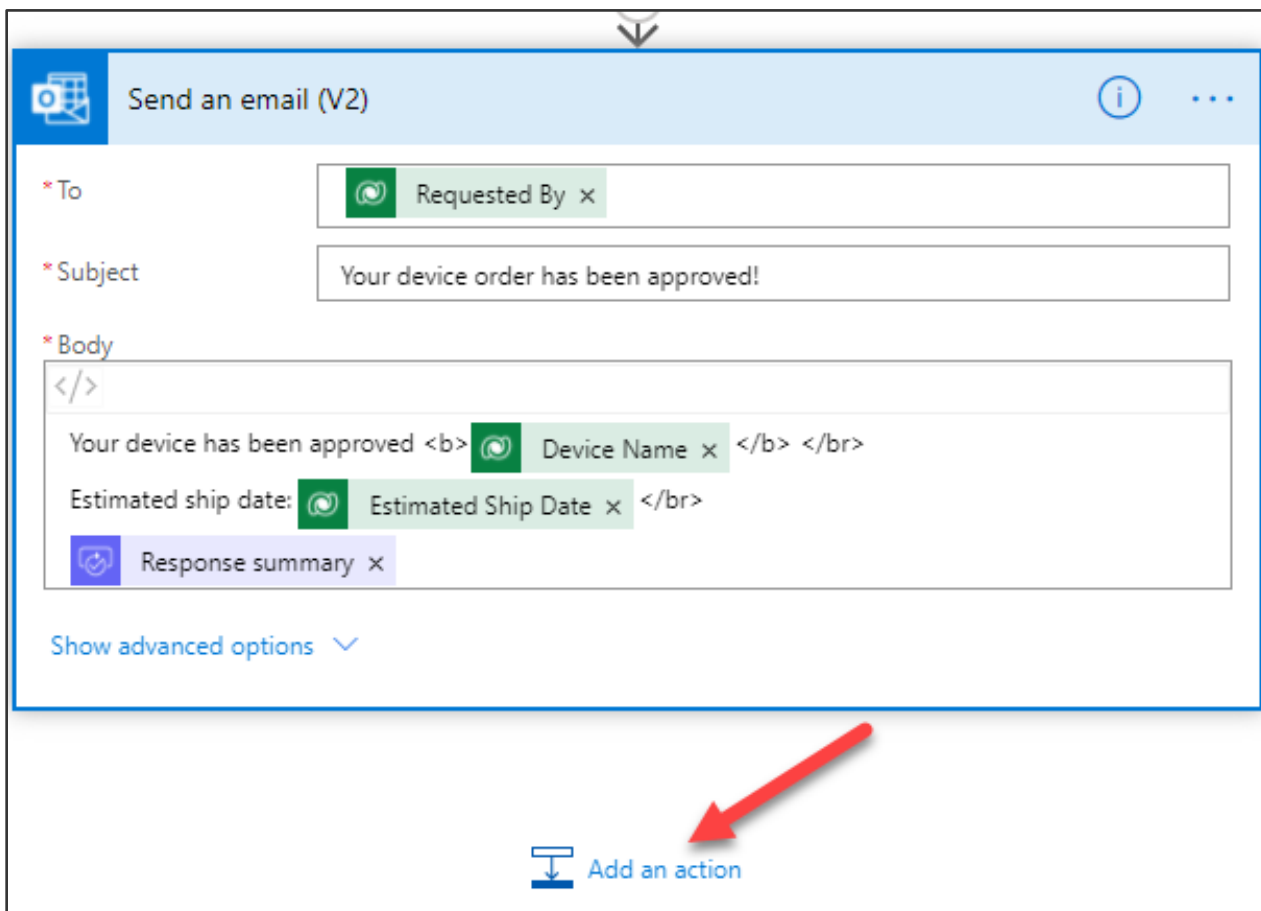

In this optional exercise, you will modify the existing flow to include a Teams notification for your approval flow.

Task 1: Modify the Flow

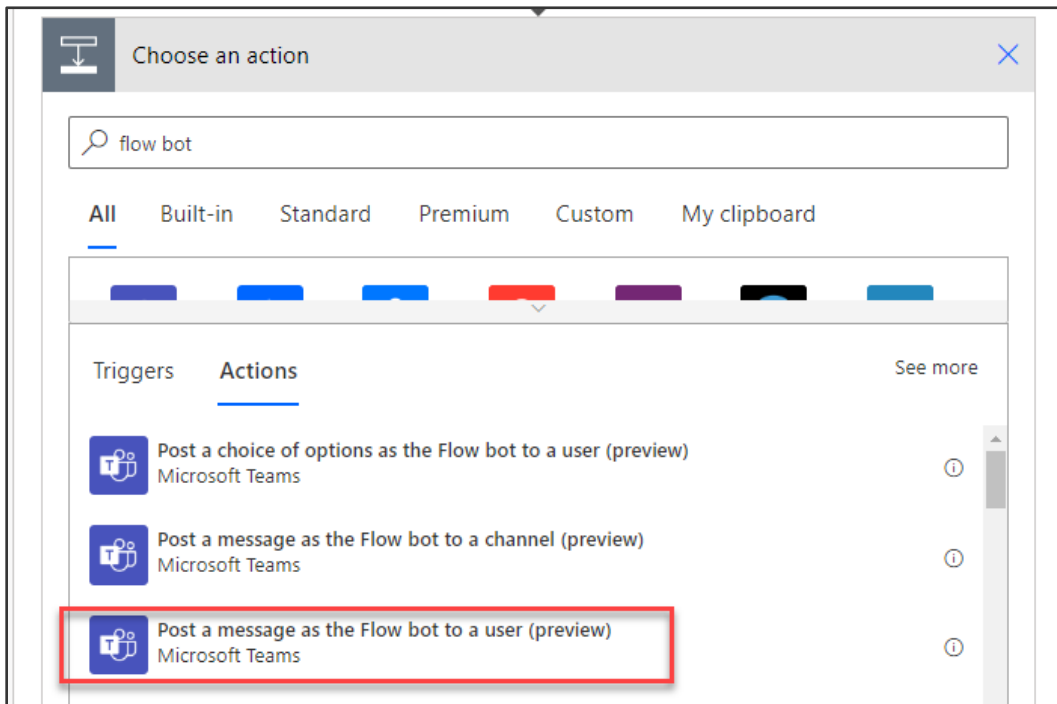

1. Click to expand the **Send an email** step inside the **If yes** branch.

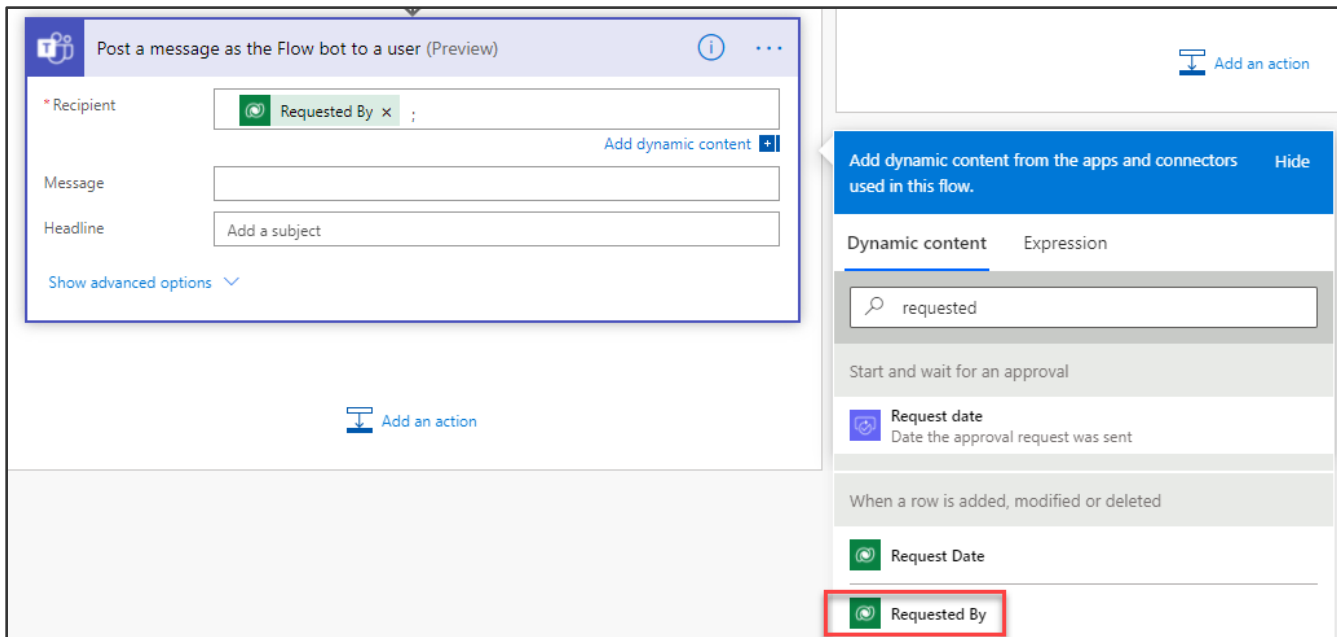

2. Click **Add an action**.

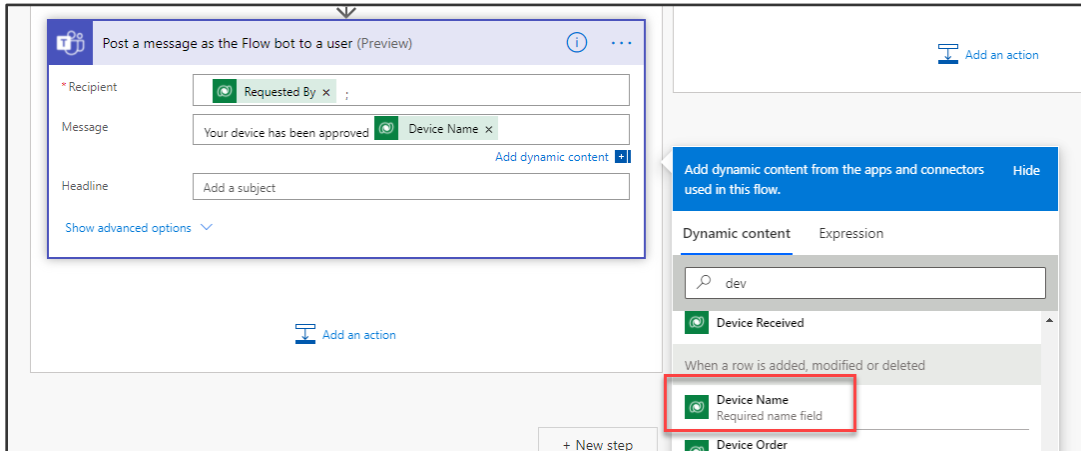

3. Search for Flow bot and select **Post a message as the Flow bot to a user**.

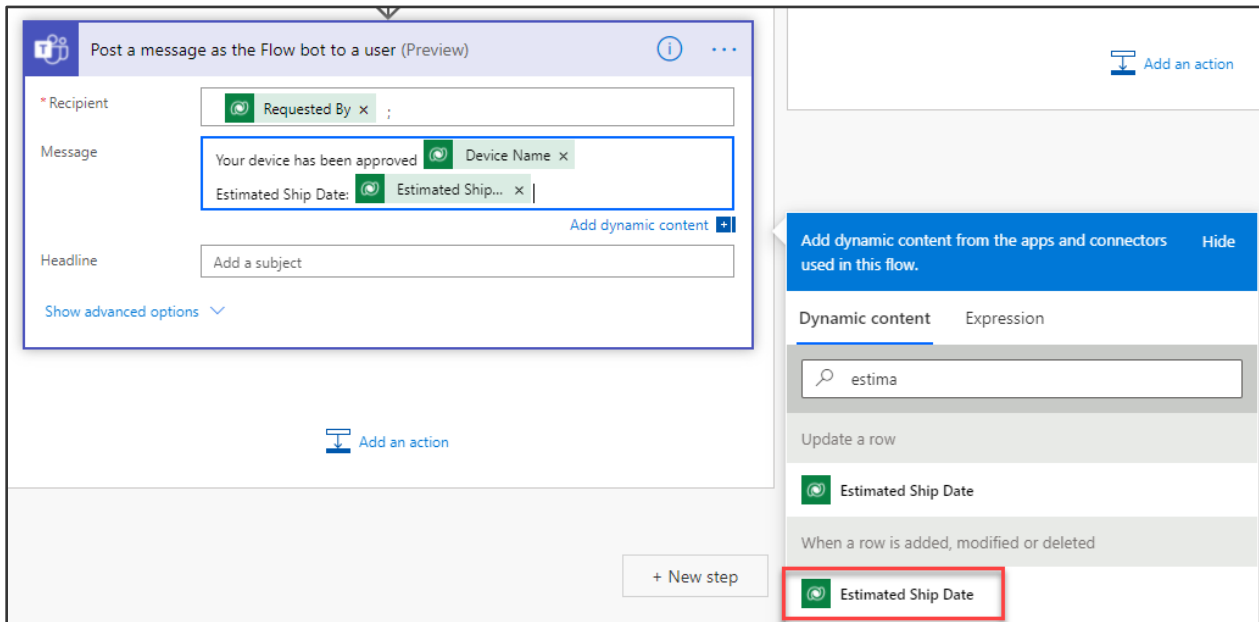

4. Insert **Requested By** in the Recipient field.

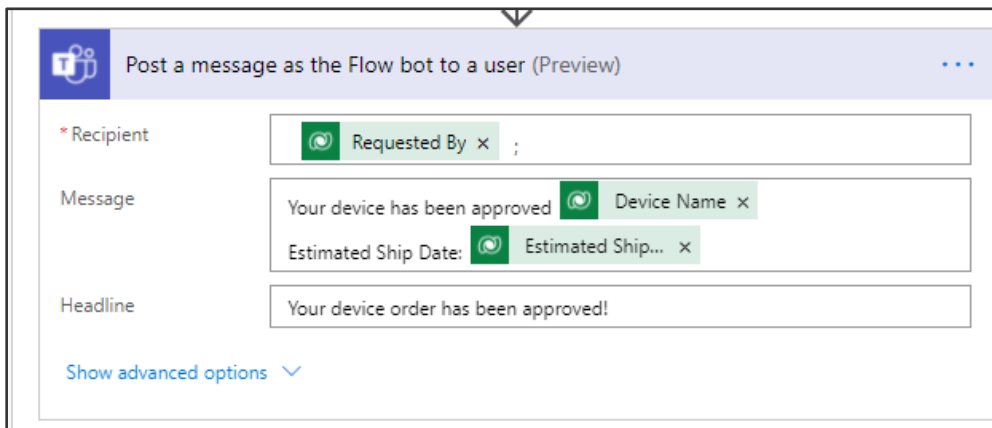

5. In the **Message** input, type **Your device has been approved** and then select **Device Name** from under the Dynamics Content **When a Record is added** header.

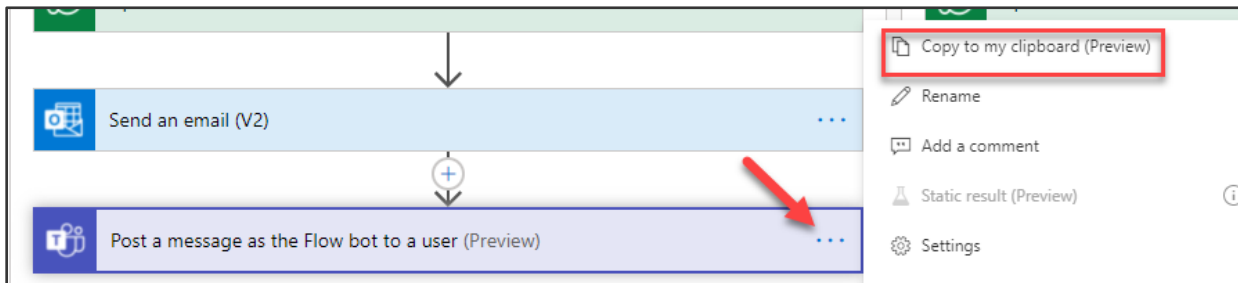

6. Type **Estimated Ship Date:** and then select **Estimated Ship Date** from under the Dynamics Content **When a record is created** header.

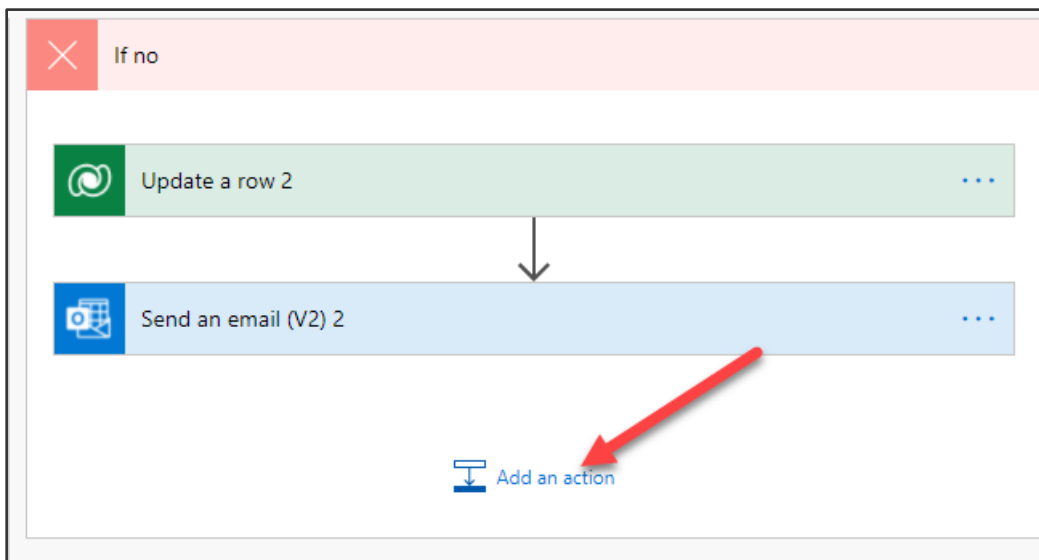

7. Type **Your device order has been approved!** for **Headline**.

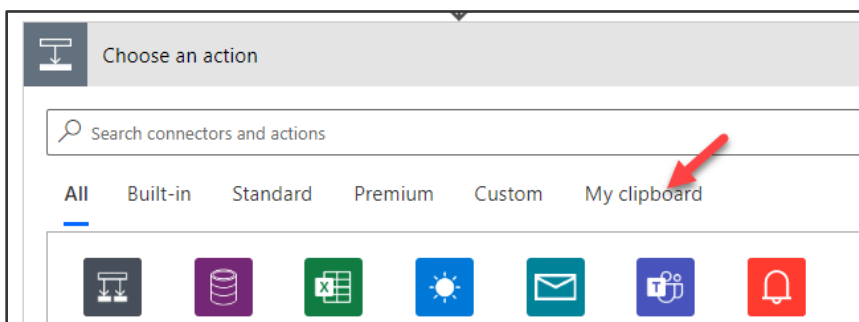

8. Click on the **...** **Menu** button of the **Post a message** step and select **Copy to my clipboard**.

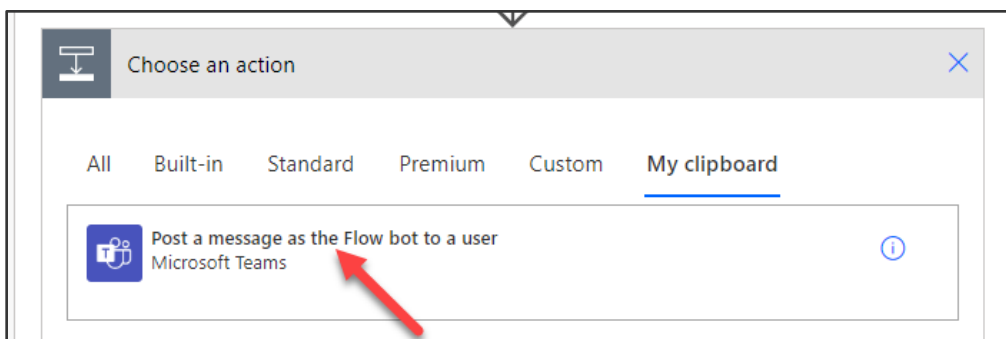

9. Go to the **If no** branch and click **Add an action**.

10. Select **My clipboard**.

11. Select the step you copied.

12. Click to expand the step you just pasted.
13. Change the Headline to **Your device request was not approved.**
14. Change the Message to **Your device request for**
15. Place your cursor at the end of the text and select **Device Name** from the dynamic content pane.

Post a message as the Flow bot to a user 2 (Preview)

* Recipient: Requested By

Message: Your device request for Device Name

Headline: Your device request was not approved.

Show advanced options

16. Add **was not approved** to the end of the content. The step should now look like the image below.

Post a message as the Flow bot to a user 2 (Preview)

* Recipient: Requested By

Message: Your device request for Device Name was not approved

Headline: Your device request was not approved.

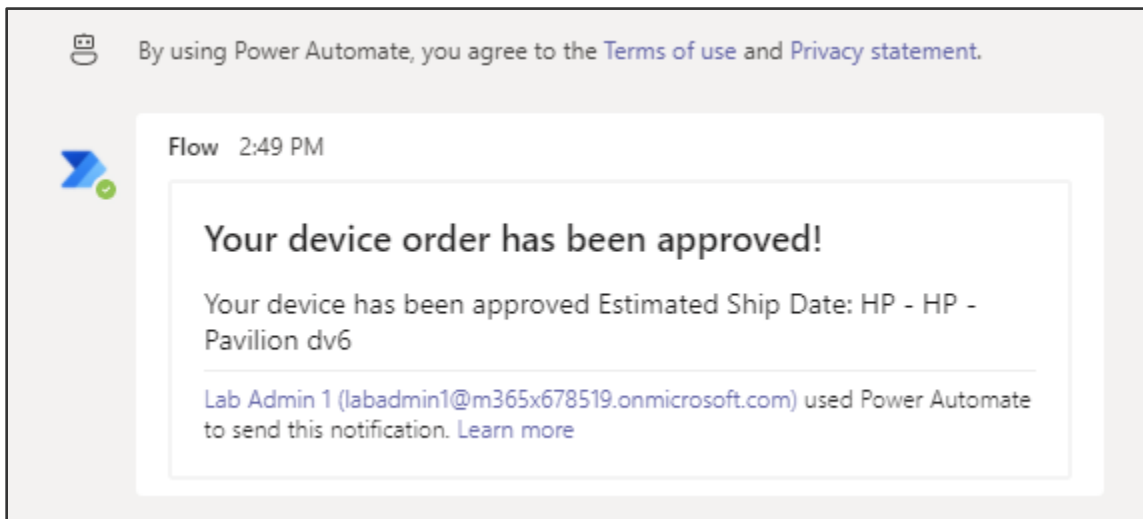

Show advanced options

17. Click **Save** to save your changes.

Task 2: Test your modified flow

Now that the flow has been modified, you are ready to test it.

1. Click **Test** in the top right of the flow editor and select **Manually**
2. In another tab, navigate to [Microsoft Teams](#).
3. Open a third tab and run the Device Ordering app -> Select a device and submit an approval request.
4. You should receive an email with options to Approve or Reject the request. Select **Approve**.
5. Shortly after hitting submit, you should see a message and a notification in the Chat tab on your app bar – this is from the Flow Bot. Click to open the chat. Wait a moment if it does not appear immediately.
6. You should see the approval of the request.

Lab survey

We would appreciate your feedback on the Business Application Platform technologies and on this hands-on-lab, such as the quality of documentation and the usefulness of the learning experience.

Please use the survey at [App in a day survey](#) to share your feedback.

You may provide feedback for each module as you complete it or at the end once you've completed all the modules. Thank you!
